## *Accomplishment of the ENIAC and the Women Computer Pioneers - A Virtual Field Trip - by the National Army Museum*

Discover how a talented group of female mathematicians laid the groundwork for the field of computer programming. Winning World War II required an all-out effort. Thousands of women on the home front answered their country's call to join the military, industry, and the civil service. In 1943, the U.S. Army recruited seven women mathematicians to set up and operate the Army's newest top secret weapon: the Electronic Numerical Integrator and Computer (ENIAC). These unsung heroes wired the electrical connections that enabled the world's first electronic, digital computer to complete 300 calculations per second. In doing so, they built a framework for the field of computer programming. A Museum educator will guide this virtual field trip as participants discover how female "computers" solved complex problems, contributing to Army innovations during World War II. (Class limit: 30)

## *An Introduction to NATO and the US European Command*

In light of the unprovoked full scale invasion of Ukraine by Russian forces, this lecture serves as a primer on NATO, US European Command, and the collective defense of Europe. After 10 years of out of area missions for the Alliance supporting the US led Global War on Terror, the strategic environment drastically changed with Russia's 2014 annex of the Crimean Peninsula requiring a better understanding of European security on the continent. Following completion of this discussion participants will understand NATO/SHAPE staff organization and how US European Command provides US capabilities and planning to the collective defense of Europe. ## Appreciation of Alcohol Inks

An enthusiastic introduction to the art medium of alcohol inks. These free flowing, vibrant colors have a mind of their own, which behave quite differently than the art mediums of oils, pastels, and acrylics. "Watercolors on steroids" is an apt description of this decade's exploding interest in these inks. Learn the pros and cons of a variety of art mediums, watch a demonstration, and experience your own hands-on techniques using art tools to create your own mini works of art on a variety of substrates. No artistic talent or previous experience necessary - honest! (\$10 for materials payable at beginning of class.)

## *Bicycle Junction: A History of Cycling in Grand Junction*

Bicyclists who have recently discovered our area's amazing roads and trails are often surprised to learn that Grand Junction has long been a cycling town. The original Tour of the Moon, part of the Coors Classic, was held in the early 1980s, then memorialized in the movie "American Flyers." In the 1940s and 50s, paperboy pelotons delivered the Sentinel and bicycle parades brought out the whole community. In fact, our town's cycling roots date all the way back to the late 1800s, when Main Street was a dirt road and South 9th Street was – unbelievably – a cycling racetrack. Learn more about our community's fun and fascinating cycling history from bicycle shop owner Chris Brown, author of *Bicycle Junction*, originator of the folk opera "One Bike" and all-around cycling history raconteur. Chris will share the research, artifacts, photos, stories and the engrossing cast of characters who are an integral part of our community history. He'll also offer insight into the best of Grand Valley rides and cycling events today, including his iconic "1871" challenge. (Class limit: 35)

## *Black Holes and the Theory of General Relativity*

Black Holes are some of the most fascinating and mysterious objects in the universe. Predicted more than 100 years ago by Einstein's Theory of General Relativity, we now we have ample evidence for their existence, including the recent discoveries of gravitational waves detected from the merging of two black holes and images of supermassive black holes at the heart of galaxies. A conceptual introduction to General Relativity will be presented and followed by a discussion about how black holes were predicted by the theory, how they can be detected, their bizarre properties, and what we can learn from them. ## *Center for Independence: How to Build a Support Network*

As we age, we need support in order to maintain our independence. It is not always possible to handle alone all the challenges that arise, some unexpectedly. When those challenges arise, "Who you gonna call?" This class will cover how to build a support network to help meet planned and unplanned challenges. It will cover a wide range of problems and topics, such as:

- how to find someone to replace batteries in smoke alarms,
- how to get answers for Medicare questions,
- how to plan for emergencies,
- how to find help with low vision or mobility issues,
- how to reduce isolation as you age,
- and many more.

Attendees will leave with an Older Adult Resource Directory that will provide contact information to help build a support network. The class will also cover where to find volunteer opportunities to help keep you connected to the community.

This class is held at the Center for Independence. Covid, RSA and flu cases are on the rise. If you have symptoms consistent with COVID-19, the flu, RSA, or you have been in close contact with someone who has symptoms of COVID-19, the flu or RSA, please do not attend the class.

Please Note: At the time of the class, if Mesa County is experiencing severe countywide outbreaks COVID-19, the flu, RSA, then a health protocol requiring class participants to have a non-contact temperature scan and to answer several health questions as they enter the building will be in place. ## *Crisis on the Colorado River*

The Colorado River flows through seven western states and into Mexico. Use of water from the River is governed by the Colorado River Compact, which celebrated its 100th anniversary in 2022, and by a complex set of court decisions, compacts, treaties and regulations known as the "Law of the River." The Colorado River is in the midst of an historic drought which is impacting the 40 million people who rely on water from the River and the millions of acres of farmland irrigated by that water. In this course you will learn about the Colorado River Compact and the Law of the River, how water flows in the Colorado River drainage have been affected by the changing climate, current negotiations between the states and directives from the federal government regarding dwindling water supplies, and how all of this could impact the Grand Valley. (Class limit: 50)

## *Equestrian Portraits*

Portrait images of Confederate leaders mounted on horseback have been highly controversial in recent years. The statue of Robert E. Lee in Charlottesville, VA, was a flashpoint for demonstrations for and against its continuing presence in that city, and it has recently been removed and destroyed. Other such statues remain controversial, such as the Theodore Roosevelt at the entrance to the American Museum of Natural History, removed in 2022. Images of this sort, portraits of military and political leaders on large scale, often cast in bronze, have a long history of over 2000 years, and have often been a focus for controversy, and have often been destroyed not long after their creation. This class presents an overview of equestrian portraits, and their fates, from Greek and Roman antiquity to the present. (Class limit: 35)

## *Exploring the Origins of Life*

A modern science-based explanation for how life started on Earth has been posited only in the past century. Charles Darwin's evolutionary description based on his 19th century voyages around the world set the stage for a much deeper understanding of the chemical and biological processes responsible for initiating life. A major breakthrough by James Watson and Francis Crick on the structure of DNA led to significant insights into hereditary control of cellular activities and the advancement of species. This class will cover the theories for how life started and evolved as confirmed through current observations. We will also explore advances in astrobiology, which lead to the search for detecting remote life like that on Earth.

Class starting on Tuesday, Feb 27, 2024 (Class limit: 50):

## *Hike Canyon Rim Trail to Window Rock*

This is almost a 2-mile easy hike that starts at the Monument's Visitor Center, goes along the rim of Wedding Canyon to Window Rock overlook. We will see and learn about all of the formations that make Monument Canyon famous without doing the six-mile hike through the canyon. Depending on the weather, this should be a great winter hike as it is an easy, flat trail with only about 250 feet of elevation gain. Be sure to wear appropriate clothing for the weather the day of our hike. When we return, I will be walking the Alcove Trail, a short trail along the Entrada Ridge across from the visitor center that anyone interested can join.

We will be meeting at the Colorado National Monument's Visitor Center at 11:00 a.m. (Class limit: 12)

Fri 2/16/24, 11:00 AM-1:00 PM

*Colorado National Monument Visitor Center  
1750 Rimrock Drive  
Fruita, CO 81521*

*The Visitor Center is 4 miles from the Fruita west entrance.*

*Remember, to gain entrance, there is a fee per car or you can show your National Parks Pass.*

## Hike Flume Canyon

This hike is a repeat of a hike led in the Spring term of 2023. It is offered again because of a large waitlist. Flume has it all: easy access in the nearby Black Ridge Canyon Wilderness, narrow passages with an intimate feel, lots of trees and shrubs and interesting geology. Not much elevation change. Consider it moderately strenuous because of an easy scramble up and down. Bring a hiking pole to keep your balance navigating boulders in the stream bed. (There may be some water in the Spring.) Wear long pants and long sleeve shirts because the poison ivy may be leafed out, or not. Meet at the Pollock Bench trailhead kiosk at 9:00 AM and we will explore the Inner Flume. The hike is 3-1/2 miles out and back. Taking it slow, you will return about noon.

When choosing hikes or nature walks, we encourage you to read the course descriptions carefully and be honest when evaluating your capability to participate. Please consider whether: you are adapted to the elevation; you have been hiking or walking regularly; you usually hike or walk a similar distance and on the types of terrain described; you have balance or breathing issues; and you can keep up with a group; etc. Your careful consideration of these factors will ensure that you will be able to complete the hike or walk as described without any serious issues and have a great time. (Class limit: 15)

Fri 3/22/24, 9:00 AM-12:00 AM

*From the Fruita round-about over I-70, go south on Highway 340. Follow the road for about 1 mile to Kings View Estates. A sign is posted for the Horsethief Canyon Wildlife Area. Turn right (west) on Kings View Road. Within 1 mile, you will bear right at a fork. From the fork travel 2 miles to the large parking lot for Pollock Bench trailhead. Here there is a restroom. Flume Canyon trail head is shared with the Pollock Bench trailhead.*

## *Historic Border Barriers from 21,000 BC to Iron Curtain*

Perhaps the most famous border walls in history are the Great Wall of China, Hadrian's Wall in England, and the Iron Curtain/Berlin Wall. Did you know that there have been at least 16 major national Border Walls, up to and including the Iron Curtain? (This class does not discuss border barriers after the 1990s.) There are at least 4 more that deserve mentioning due to their historic impact. This class will examine the purposes and success of each, with the final focus on the Iron Curtain/Berlin Wall. (Reworked and expanded former class "Iron Curtain.") (Class limit: 45)

## *History of Alaska's National Parks*

Seven decades, between 1910 and 1980, mark the foundational years to the Alaska's national park units. The national monument component plays a huge part of this story as does the importance of science in the early years. Equally important are two federal laws in 1971 and 1980 that shaped the protection and management of millions of acres of public land for the future. (Class limit: 50)

## *Hoofbeats from the Past: Archaeological Evidence of the Horse in Western Colorado*

Dominquez Archaeological Research Group (DARG) archaeologists are actively working to document and record horse related rock art in western Colorado. These rare pictograph and petroglyph images depict the horse as it was experienced by the Indigenous peoples who used, cared for, and valued them. Recently, DARG researchers have discovered unexpected and surprising details in these images by applying decorrelation stretch technology to curation quality photographs of this very special type of rock art. Today these fragile images are threatened by climate change, wildfire, and vandalism. Locating and scientifically documenting them aids in protecting and preserving them for you, your children, and for future generations. Join archaeologist H. "Sonny" Shelton as she takes you on a journey to explore the origins of the horse in western Colorado, including fossils found in the Grand Valley, buried faunal remains, and the remarkable story of the horse as preserved in the Native American rock art of western Colorado. ## *How Language Changes Over Time: A Short History of the English Language*

In this discussion-oriented course, we'll take a whirlwind tour of the history of the English language from its origins in Celtic and Anglo-Saxon tribal dialects to its present-day forms. Along the way, we'll dip our toes into a number of overlapping areas of interest, including geography, European history, sociolinguistics, demography, medicine, political science, religion, and cultural anthropology. In short, we'll look at how all of these areas of interest have contributed to the on-going story of the remarkably flexible language we recognize as English. (Class limit: 25)

## *Human Trafficking in Colorado*

Human Trafficking is a lucrative and thriving industry that takes place around the globe and right here in Colorado. The Colorado Human Trafficking Council (CHTC) was established through legislative action in 2014. As part of that legislation, the Colorado General Assembly tasked the CHTC with the development of training standards and curricula on human trafficking for a wide range of sectors. In 2016, the CHTC created its first training program: An Introduction to Human Trafficking in Colorado in order to help establish a common language and understanding of human trafficking and its impact in Colorado. This interactive program is designed to provide participate foundational information on the topic rooted in the Colorado context. (Class limit: 35)

## *John C. Fremont: The Complex Pathfinder*

After his first expedition West mapping a route for the Oregon Trail to the South Pass, John C. Fremont enjoyed a meteoric rise in fame. He quickly became a national hero renowned as a pathfinder who would be credited with opening the West to settlement. From there he would go on to become a national politician, the Republican Party's first nominee for U.S. President, a Civil War General and Territorial Governor of Arizona. Much of this fame though would be tainted with accusations of corruption, incompetence, and atrocities especially against Native Peoples. Many saw him as an impetuous dreamer who did more to promote unrealistic schemes. Join us as we study this very influential though very complicated man. (Class limit: 50)

## *Journey of Cultural Discovery: the other Georgia*

The ancient country of Georgia lies between the Black and Caspian Seas, on the south side of the Caucasus Mountains. Its origins can be traced to at least 600 BC, yet many people are largely unaware of its existence. This class introduces its long history, takes a close look at its geography and its unique culture. A culture that has thrived despite centuries of rule by other nations, most recently the Soviet Union. In November, the TV news magazine show 60 Minutes aired three articles on this hospitable country. (Class limit: 45)

## *Meeker Incident and the White River War*

After years of encroachment on their lands, White River Ute attacked an Indian agency staffed by Agent Nathan Cook Meeker on September 29, 1879. The hostility escalated when cavalry troops under Major Thomas Thornburgh engaged with the Ute at Milk Creek in what became one of the last major Indian War conflicts in U. S. history. The ramifications of these incidents have had long lasting implications that changed the course of Ute and Colorado history. (Class limit: 50)

## *Probing the Puzzles of History*

Historical puzzles have always intrigued author Bob Silbernagel. Why did people take certain actions that significantly affected the outcome of major and minor historical events? And how were some folks able to accomplish things that seem baffling in hindsight. Several of these incidents have caught Silbernagel's attention over the years, and he will discuss three of them that he delved into in his most recent book, "First Draft." (Class limit: 40)

Tue 2/6/24, 10:00 AM-11:30 AM

## *Psalms as Literature*

The Bible is a complex anthology of ancient literature in many forms, written over hundreds of years. The psalms are a significant part of that body of work. The class will consider the psalms as literature while acknowledging their importance to prayer and worship in Jewish, Christian and other faith traditions. It is not a course in religion and is open to participants regardless of individual spiritual beliefs. We will consider elements such as the images and rhythms of the psalms as lyric poetry; types of psalms; and the distinctive characteristics of Jewish poetry. One of the hallmarks of enduring literature is the capacity for multiple layers of interpretation and the class will allow opportunities for discussion. (Class limit: 15)

## *Religious Voices in Irreligious Times*

Join with Rev. Larkin to engage with "saints" and "sages" of the past who have spoken into the void, stared it in the eye, and have found new places to live on the other side. These voices include Dietrich Bonhoeffer, Dorothee Sölle, Lao Tzu, Mahatma Ghandi and others. Let's dare to listen to what they have to say, open ourselves up to being confronted so we can ask new questions and conceive of new answers, and find our own religious voice in this irreligious time. (Class limit: 20)

## *Stories Behind the Photos - Stepping Back in Time on Colorado National Monument's Rim Rock Drive*

Join longtime National Park Service volunteer, former Colorado National Monument Association employee, and historian Terri Ahern for a photographic look back in time from the Colorado National Monument. The photo exhibit and discussion will focus on historic black & white images from the Civilian Conservation Corp era in the 1930s and Mission 66 in the 1960s and will be compared with color images of how the area looks today. Let's look back in time together and see what has changed from the same locations along Rim Rock Drive in the Colorado National Monument. (Class limit: 30)

## *Two Countries Divided by the Same Language: American English and British English*

George Bernard Shaw is not the only person to make the observation that American English and British English are quite different from each other; in this presentation, we'll employ linguistic principles to examine the many ways American English diverges from British English, and why that matters (or doesn't). We'll start with a photographic tour of England to set the stage for a discussion of the phonological, lexical, and semantic ways these two countries speak and write the English language. (Class limit: 30)

## *Why Not Sourdough?*

Sourdough baking is at the root of Pam's family. Pam and her husband have spent many years together studying sourdough fermentation, grain, milling flour, and networking and connecting with other sourdough souls. While living on a corn farm on the Hamakua Coast of the Big Island of Hawaii, they started and maintained their own starter, building a bakery business which has now returned to Grand Junction. She has much to share about what sourdough culture brings to our health and relationships. (Class limit: 24)

## *Women in Colorado History*

Historians have discovered the stories of many iconic Colorado women who took major roles in our state's history. They were doctors, athletes, businesswomen, artists, authors, and reformers.

An authentic cowgirl, Marie Scott rode the range, branded cows, pitched hay, and fed her livestock. But, Marie was also a shrewd businesswoman who acquired over 100,000 acres of land stretching all the way from the Dallas Valley near Ridgway to Utah.

The Babe could run, jump, pitch, play championship golf, hunt, fish, and play pool. Mildred Ella "Babe" Didrickson is considered by many sports authorities to be the greatest all-around sports woman of the twentieth century.

Ruth Mosco Handler had been short of playthings as a child and was always inventing toys out of the oddest things. She and her husband Matt founded the Mattel toy company. Their daughter Barbara loved playing with paper dolls, liking to dress them in the latest fashions. Ruth wondered if she could make a 3-dimension fashion doll – and she did.

This program explores the lives of these three woman and ten others who contributed in unique ways to Colorado's history. (Class limit: 50)
